SUMMARY

Graduate student in Computer Engineering with strong proficiency in programming languages, including Java, Python, and C++. Possesses a solid foundation in advanced object-oriented programming, data structures, and algorithms. Skilled in tackling complex engineering problems with a research-driven approach and a collaborative mindset, honed through hands-on projects and academic initiatives. Enthusiastic about applying technical expertise to innovative solutions and contributing to cutting-edge developments in the field.

PROFESSIONAL EXPERIENCE

Prinston Smart Engineers, Bangalore, India 08/2023 - 09/2023
Full Stack Developer Intern

- Gained hands-on experience in developing web applications using full-stack technologies during a project-based internship.

Compsoft Technologies, Bangalore, India 03/2023 - 04/2023
AI Engineer Intern

- Worked on an advanced AI-based project titled "Lip-to-Speech: Text Synthesis", contributing to model development and training for generating text from lip movements.

EDUCATION

Stony Brook University, New York, USA. Present

Master's degree in Computer Engineering

Currently pursuing coursework in Advanced Database Systems, Computer Vision, Artificial Intelligence and Machine Learning, and Embedded Systems, focusing on solving real-world engineering challenges through practical and research-oriented approaches.

K S School of Engineering and Management, Bangalore, India 2024

Bachelor's degree in Computer Science Engineering CGPA-8.45

Completed coursework in Database Management Systems, Computer Graphics, Artificial Intelligence and Machine Learning and Mobile Application Development, applying theoretical knowledge to real-world software engineering problems.

PROJECTS

Text2Image Generator 06/2024-08/2024

Built and deployed an AI-powered text-to-image generation tool, allowing users to generate images from text input using a custom algorithm.

Image Caption Generator using CNN and LSTM 09/2023-05/2024

Developed a deep learning-based image captioning model that generates multilingual captions for uploaded images.

Pizza-Shop Website 08/2023-09/2023

Developed a fully functional e-commerce website for a pizza shop, featuring user authentication and real-time order processing.

SKILLS

Programming Languages: C, C++, Java, Python.

Web Development: React.js, Node.js, REST APIs HTML, CSS, JavaScript.

Database Management: MySQL, MongoDB.

KEY ACHIEVEMENTS

PUBLICATION 05/2024

Title: Captionify: Bridging the Gap between Vision and Language with Neural Networks. IJRASET

Published a research paper titled "Captionify: Bridging the Gap between Vision and Language with Neural Networks" in International Journal for Research in Applied Science and Engineering Technology (IJRASET), highlighting the development of an Image Caption Generator using CNN and LSTM, providing multilingual captions for images, and received recognition for its practical AI applications in vision and language.

PARTICIPATION IN ATRIA STATE-LEVEL PROJECT EXHIBITION 04/2024

Participated in the Project Exhibition, presenting the Image Caption Generator using CNN and LSTM, received valuable feedback from industry experts, improved the model's accuracy by 10%, and enhanced collaboration skills through networking with professionals and peers.
